

GETTING STARTED WITH HOPEX DOCUMENTATION

Browsing online documentation

We recommend that you use Chrome.

Clear your cache through the browser options on occasion so that you can get all the latest help updates.

To return to a page previously viewed, press the <ALT> + <Back> keys at the same time (or right-click and select **Previous**).

Searching online documentation

To obtain more precise search results, you can use the AND, OR and NOT operators and quotation marks.

You can combine the boolean operators; you cannot however use parentheses to create groupings.

Example of search syntax

Search example	Search Results
<i>regulation framework</i>	Pages that contain both terms (not necessarily consecutive)
<i>"Regulation framework"</i>	Only pages that contain the exact phrase enclosed in quotation marks
<i>regulation AND framework</i>	Pages that contains both words in any order (same result as searching for <i>regulation framework</i>)
<i>regulation OR framework</i>	Pages that contain any of the two terms
<i>framework NOT regulation</i>	Pages that contain "framework" but not "regulation"

Other languages

We offer the possibility to use automatic translation service through the  icon.

 For more information of translations available as standard, see ["Available Documentation by Language", page 1](#).

Do you have comments on our online documentation?

Please use  at the top right corner of each page.

Other information sources

You can also access the [knowledge base](#) and browse forums in our [Community](#)

AVAILABLE DOCUMENTATION BY LANGUAGE

Some features may not be described in the language you are interested in. However we offer the possibility to use an automatic translation service.

To launch automatic translation:

1. Click .
2. Select a language and click **Translate**.
The translation of the page is automatically generated.

 *MEGA shall assume no liability for any errors or inaccuracies of machine translation.*

By default we provide documentation in the following languages:
